PROFESSIONAL SUMMARY

Senior Frontend Developer with 8+ years of experience building web and mobile applications for government and enterprise clients across Saudi Arabia and Egypt. Works primarily with React, TypeScript, Angular, React Native, and Flutter, with a focus on clean, maintainable client-side code and close cross-functional collaboration. Comfortable taking ownership of features end to end and supporting teammates, and interested in growing into a technical leadership role.

TECHNICAL SKILLS

Frontend: React.js, Angular, TypeScript, JavaScript (ES2022+), HTML5, CSS3, Tailwind CSS

Mobile (Cross-Platform): React Native, Flutter

Integration & Tools: REST APIs, Git, GitFlow

Practices: Agile/Scrum, code review, cross-functional collaboration

Languages: Arabic (Native), English (Professional Working Proficiency)

PROFESSIONAL EXPERIENCE

Senior Software Developer | ADTE (outsourced to NIC – SDAIA)

Riyadh, Saudi Arabia

October 2022 – Present

- Develop the Companies' Commercial Records services on the Saudi Business Center (SBC) platform using React and TypeScript, focusing on a seamless, efficient user experience.
- Contribute to internal systems for the National Information Center (NIC) in addition to the SBC platform.
- Collaborate with cross-functional teams to integrate features, improve performance, and meet business requirements through the platform's launch and ongoing enhancements.

Senior Frontend / Mobile Developer | Arabian Information Technology Co. (ARCOM)

Cairo, Egypt

January 2020 – October 2022

- Delivered web and cross-platform mobile applications for digital transformation projects across Saudi universities.
- Built "Qarar," a real-time video conferencing management application used by Saudi universities, in Flutter.
- Developed "Order Plus," a multi-vendor SaaS e-commerce platform in React Native for multiple business clients.
- Worked with product owners and stakeholders to turn business requirements into technical plans.

Frontend Developer | roboVics (Microengineering.ca)

Cairo, Egypt

January 2019 – January 2020

- Joined a mobile app development team building Pedesting, an indoor navigation app for the Canadian government.
- Contributed to the app's development in React Native, collaborating with an international remote team; also worked on RoboGarden and CodeGoat (launched as Codingville).

Frontend Developer | Evaaz

Cairo, Egypt

July 2018 – January 2019

- Worked on several Angular projects, including the Saudi Speakers Bureau, evaaz.com, and taj51.com.
- Improved code collaboration using source-control strategies (GitFlow branching).

Frontend Developer | QuaNode

Cairo, Egypt

August 2017 – May 2018

- Started as an intern and progressed to a front-end developer role.
- Worked on several projects, including BEHAVIORS, Smart-Doc, and Go-Legal, using Angular.

EDUCATION

B.Sc. in Information Systems | Helwan University

Cairo, Egypt

Faculty of Computers & Artificial Intelligence · September 2013 – May 2017

CERTIFICATIONS

- EMC Academic Associate — Cloud Infrastructure & Services · Dell EMC · 2017
- Certificate of Appreciation, Web Development · DAAD (German Academic Exchange Service) · 2015
